Bitexen Frontend Code Challenge

Task Definition

Basically, we want to see Rick and Morty episodes in React Application.

Requirements *(Must have)***:**

- Episodes have characters in episode details.
- Characters options will be filterable and sortable on the episode detail page.
- The characters must have detail pages.
- Use REST methods of API instead of GraphQL.

Optional Requirements *(Nice to have)***:**

- Use React hooks
- Add responsive support for mobile browsers
- Write unit test

General Rules

- Write a project with React Framework.
- Write documentation for the project.
- Upload your code into git providers like Github, Gitlab or Bitbucket. When you are ready, notify by email and give access to us the code review process. *Please make your repository private.*
- We are waiting for you to return with an estimation for the task after receiving the email. It depends on you. But we expect you to keep up with the estimation.
